Class Descriptions

Inventor's Workshop

Enter this Maker Space and create inventions that can solve problems and make life easier for everyone. Students will be given a challenge each week to create something that has never been thought of. This class will stretch your child's imagination and enhance their creativity.

Reading & Writing

Students will enhance their skills in reading and writing by exploring a variety of literary works and developing a repertoire of written language through original stories, myths, poetry, and other forms of creative expression. Skills taught will help set the stage for writing success with the Common Core State Standards (CCSS). CCSS in all grade levels.

Math Masterminds

Students will tackle math puzzles, challenges, and learn how to solve a variety of math problems, while also learning about the life and times of some of the world's great mathematicians. Students will explore key math concepts, problem solving, and hands-on learning to help them build strong math skills using everyday math curriculum.

Forensic Science for Kids

Become a CSI Expert! We'll learn how to use science to figure out unsolvable crimes, mysteries, and more. Discover how crimes are solved, through evidence collection, fingerprinting, DNA analysis, and digital surveillance.

Comic Book Art

Does your child love to draw and create their own stories? This class will teach them the skill of cartoon drawing and creating their very own comic strip. Students will create and draw characters and then write stories about them, and put them together in a cool comic strip they can share with others. We'll even have a professional cartoonist visit us for inspiration and share some stories.

Photo Journalism

Students will enjoy this creative, exciting and stimulating class as they are transformed into reporters, photographers and editors. The class blends the two arts of journalism: photography and writing.

Students will compose and edit their stories on computers, and use cameras to take pictures for the news stories, creating an original newspaper!

Creating with Clay

This pottery class provides a much needed creative outlet for your child, under the guidance of an experienced and caring instructor. Using their imagination, kids will learn to make fun and functional clay creations such as coil and pinch pots, creative tiles, and clay figures. Students also learn techniques for painting their pottery and using colorful glazes before firing them in the kiln.

Cooking Basics

This class is a recipe for fun! Growing gourmets will have the opportunity to create delicious treats, while being introduced to cooking vocabulary and techniques. We'll measure and mix ingredients, use a variety of kitchen tools and utensils, and learn about etiquette, nutrition, safety, kitchen math, and sample a variety of new foods.

Lab Coat Kids

Grab your lab coat and sign up for this super summer science adventure where every kid becomes a real scientist performing real experiments in a safe, fun-filled learning experience! We'll explore the many aspects of science, and focus on using the scientific inquiry process.

Class Schedule

Students must enroll in classes for the grade level they will be entering in the Fall of 2019. Early Registration is Recommended - Classes are filled on a first come, first served basis.

| Course Title | Period 1 – 8:30-9:30 Grade Level – Class Code | Period 2 – 9:35-10:35 Grade Level – Class Code | Period 3 – 10:40-11:45 Grade Level – Class Code |
