We want to know about your experiences with AAC!

The purpose of this research study is to understand how augmentative and alternative communication (AAC) plays a role in the lives of Latino families.

To participate, you must:
- Identify as Latino
- The primary AAC user in the family is exposed to more than one language

Participation involves:
- One 1-2 hour meeting (can be a family group interview and shorter if preferred) via Zoom or phone call where you'll be able to share your families' experiences with using AAC
- Each participating family member will receive a $50 e-gift card for their time

If you are interested or want to find out more information, please contact Erika Prado at: erikaprado@uchicago.edu or (805) 746-0370

Principal Investigator: Dr. Michele Friedner
