

Partnering with Fathers

**WORKSHOP FACILITATOR: DEUTRON KEBEBEW
BRAZELTON TOUCHPOINTS CENTER**

November 2, 2023, 9:00 a.m. - 12:30 p.m.

Fathers bring unique ways of parenting that offer important benefits for children's development, learning and wellbeing. Whether living together or not, when two caregivers are raising a child, and are able to partner to complement the gifts that each of them can bring, everyone benefits. In this workshop, we will discuss strategies to engage fathers in early childhood programs and family-focused services, and to support parents as co-partners.

Audience: Fathers, mothers, professionals who work with families of young children, including early educators, child care providers, mental health consultants, pediatricians, early interventionists, and Regional Center staff.

Deutron Kebebew is a father, husband, and a mentor to fathers, father figures, and young people in our community. He is the Founder and Executive Director of MENtors Driving Change for Boys, Men and Dads, a local social justice nonprofit organization. Previously, Deutron managed and directed the Supporting Father Involvement (SFI) evidence-based clinical research project for over a decade in Santa Cruz County (California) in partnership with UC Berkeley and Yale University.
